HoD/EEE

The following points were discussed:

1. Details of various teaching aids practiced for the academic year:

A review of the teaching methodologies including the use of projectors and online resources to enhance classroom teaching effectiveness.

2. Industry- institute interaction:

Focus on collaborations with companies to expose students to real world industry practices and demands.

3. Details of students' in-plant training:

Information of students' participation in in-plant training programmes including the company names and the skills learned.

4. Details of students' participations in co-curricular and extra-curricular activities:

Discussion on the various co-curricular and extra-curricular activities that students had participated in throughout the year, which provides opportunities for them to network with peers and industry professionals.

5. Details about placements and higher studies:

The discussion focused on the placement and higher studies statistics for the academic year and shared the data on the number of students who had been placed in various companies, as well as those who opted for higher studies.

6. Details of laboratory facilities and utilization:

The facilities of the laboratory available in the department and their utilization were discussed and noted that the laboratories were well equipped and had been utilized effectively by students and faculty members throughout the year.

Suggestions

1. The members were suggested that the faculty members should strive to relate the concepts taught in class to real-time applications, in order to be more relevant and engaging students.
2. Faculty members were advised to guide students in developing strong fundamental knowledge in their area of interest in order to prepare them for interviews.
3. The members were suggested to encourage the students to engage in discussion with their peers about the latest technologies.
